

Smarter decisions. Simplified delivery. Engaged citizens.

Additional Features

Optional modules available to purchase include:

Demographic and location data — better understand your customers with discounted Government pricing for a range of data sets such as consumer segmentation data (CAMEO), building footprint data (GeoVision), consumer spend potential, street data, population estimates and projections, cadastral data and points of interest.

Reporting tools — to produce customised cemetery, property and flood reports.

Data validation and data quality tools — to ensure the accuracy of customer data.

Single customer view — consolidate data across multiple corporate systems to create a 360 degree view of every customer, interaction and relationship.

FME (Feature Manipulation Engine) — for easy data manipulation and integration of hundreds of sources of data. Easily turn manual tasks into repeatable or event based workflows.

Benefits

Affordable. Pricing is based on the number of rateable properties, making it affordable for all councils to access an integrated suite of Location Intelligence solutions, regardless of their size.

Integrated. The products in the LGEP suite integrate easily with each other and with corporate systems such as rates, finance, document management and assets.

Training and Professional Services. Get maximum value from your LGEP solution by leveraging training, mentoring and consulting from our experienced and skilled professional services team.

Rapid time to value. The LGEP solutions are ready to use and designed to deliver rapid ROI.

Be part of a community. Join our online community of users from across Australia and New Zealand to network, share knowledge, resources and expertise.

Scalable. Start small and scale easily to meet the growing needs of your council. Easily add new solutions and modules to the program to get even more value.

Trusted. The LGEP is a proven solution that has been deployed at hundreds of councils globally. We are a preferred supplier to Local Government in Australia.
