

## Case Study: Accelerated Reporting

### Business Challenge

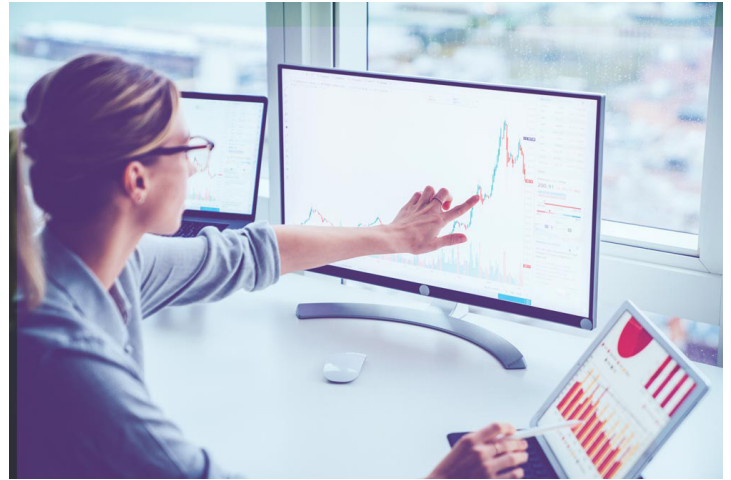

- Regulatory requirements for a telephone number address project required special considerations for internal and external management
- Managing telephone number ranges in ordering systems was going to involve months of requirement development, coding and testing in Oracle
- Separate solutions for initial clean-up and ongoing maintenance were required
- The logic involved in managing ranges was difficult to define

### Solution

- An agile solution that can be used for both clean-up and ongoing processing with limited requirement development
- The addition of audit points and alert points in the process of data quality and process failure
- The business process was delivered in 3 weeks by non-traditional IT resources with no additions to the existing IT backlog

### Benefits

- Data360 Analyze supported rapid development and scenario testing
- A single solution that provided consistent results delivered in weeks and not months
- Did not require overburdened infrastructure resources

#### Client

Multinational mediacom conglomerate

#### Industry

Telco

#### Solution

Data360 Analyze

#### Results

Reduced preparation time from 6 months to 3 weeks

Reduced preparation time from

**6** → **3**  
months      weeks
