# Accelerate your journey to SAP® S/4HANA

## And improve the quality and speed of your ongoing data management operation
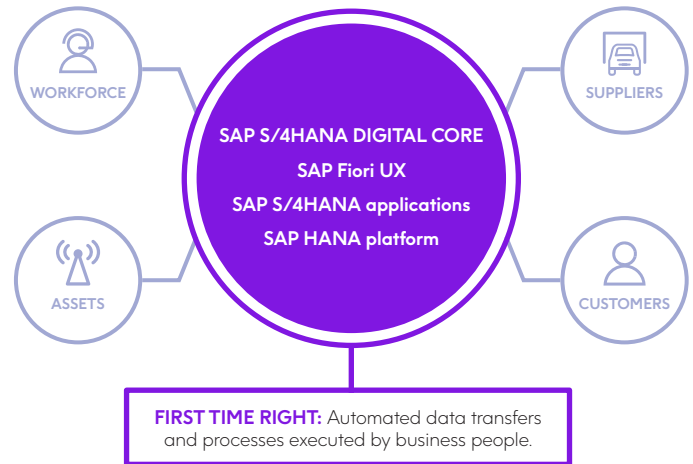

### Ensure the quality of data in your digital core

Over the coming years, SAP® S/4HANA will become the digital core for many organizations, surrounded by cloud-based systems that enable new and innovative business models.

In this new world of real-time analytics where data is no longer staged, it's essential to get data right the first time.

Precisely provides a range of solutions to accelerate your journey to S/4HANA and improve the quality of your data during your transition and ongoing operations.

Our software is designed for people in the business and doesn't require specialized SAP programming skills, enabling them to participate in the transition and streamline business-as-usual operations once you're up and running on S/4HANA.

### Planning best practices for your journey to SAP S/4HANA

- **Don't treat your move to S/4HANA as a simple technical migration**—it's not just an IT project, it's a change management challenge for the business.

- **Engage with business leaders and key stakeholders**—to understand how S/4HANA will support strategic business objectives over the next few years.

- **Choose your transition approach**—most organizations with multiple SAP instances opt for a phased approach with a gradual transition.

"Ensure your transition to S/4HANA is not viewed as a technical migration; otherwise, you risk missing out on potential benefits and may underestimate the total project effort required."

# Use Precisely Automate to ease your journey to S/4HANA, ensure data quality, and streamline ongoing operations

| YOUR JOURNEY TO SAP S/4HANA | HOW PRECISELY AUTOMATE CAN HELP |
|---|---|

## SAP ECC

- Simplify the system
- Optimize business processes
- Plan on engaging the business

### Before (Preparation)
**PREPARE YOUR SAP LANDSCAPE TO FACILITATE THE JOURNEY**

- Enable the business to build solutions that replace customizations and simplify your system
- Easily convert your customer/vendor master data to business partner

## ECC & S/4HANA

- Migrate data between systems gradually
- Involve the business in facilitating and accelerating the data migration effort
- Flexibility to adapt plan to react to M&As

### During (Transition)
**ACCELERATE YOUR MIGRATION JOURNEY AND REDUCE COSTS**

- Enable the business to extract, clean, validate, and upload data using Excel—for any data object in SAP, including custom objects
- Migrate data from legacy and SAP systems
- Validate and simulate against S/4HANA before uploading
- Reduce dependency on costly IT resources or consultants

## S/4HANA

- Ease UX transition to increase user adoption
- Continuous improvement

### After (Ongoing Operations)
**CONTINUE USING PRECISELY FOR ONGOING DATA MANAGEMENT IN S/4HANA**

- Use the Precisely solutions created during migration to automate ongoing tasks
- Increase user adoption of your new system
- Reduce user training by providing easy-to-use Excel or forms-based solutions

---

"Without Precisely we could have never finished the data migration successfully. It really saved our S/4HANA project."
