Al Readiness Assessment

orecisely

The Al advantage – and challenges

With competition in the digital economy fiercer than ever, it's easy to understand why businesses are racing to harness the power of artificial intelligence (AI) to:

- · increase productivity and efficiency
- · attract and retain customers with personalized service
- · create new ideas that provide a competitive edge

And yet ...

- · Only 12% of organizations have Al-ready data1
- 70% face challenges integrating data into Al models due to issues around data quality, defining processes for data governance, and having sufficient training data.²

Incomplete data, poor data quality, compliance and policy struggles, and lack of context for AI to deliver accurate and actionable outputs ... do these challenges and others like them sound familiar?

The fact is: there's no trusted Al without trusted data. And trusted data requires data integrity. Precisely's Data Strategy Consulting team is here to help.

Engage Data Strategy Consulting to start your Al journey

Precisely is the global leader in data integrity, and our data strategy experts will guide you on your Al journey with our Al Readiness Assessment. Together, we'll identify your strengths, weaknesses, and gaps to address for a successful Al project.

Deliverables include:

- Actionable roadmap for your Al data initiatives, directly aligned to your business goals and objectives
- Data maturity assessment and fit gap analysis aligned across people, processes, and technology
- ✓ Strategies to create enthusiasm and improve data literacy to advance and accelerate data as a strategic asset
- A clear path to value through continuous improvement of business-critical data

Ready to kick-start or reinvigorate your Al initiatives to ensure they align with your goals and deliver value?

Start your Al journey on the right path today.

12%

"Only 12% said their data was of sufficient quality and accessibility for AI"

Use data to predict future trends

Al capabilities

- Identify trends in data for better decision-making
- Make predictions about future events to proactively respond
- Optimize processes for efficiency and improved bottom line

Data essentials

- Data quality
- Data quantity
- Data diversity
- Data preparationData governance
- Data infrastructure
- Data analysis & modeling
- · Data culture

Al is data-bound
